# DP800

Premium Steam Distillation Appliance

## The Best Steam-Distilled Water Solution for Dentists

**PROBLEM #1: BACTERIA & BIOFILM.** According to the American Dental Association, dental unit waterlines have been shown to harbor, in significant numbers, a wide variety of bacteria, fungi, and protozoans.

**PROBLEM #2: VERY SENSITIVE AUTOCLAVES.** New autoclaves and Statim machines require pure distilled water on a consistent basis or they will not operate properly and their lifespan could be shortened.

**SOLUTION:** Dentists should use only pure, steam-distilled water in their Dental Units and autoclaves.

## Recommended by Unthank Design Group

*"For patient safety, we have long advocated using steam-distilled water in a closed water system for dental delivery. A DENTAL PURITY in-office distillation system provides for a convenient continuous supply of the purest water."*

Michael Unthank DDS

# DP800

## Premium Steam-Distillation Appliance

The DP800 is a countertop distillation appliance that automatically produces distilled water for small to medium dental offices. It's small footprint combined with automatic operation make this unit very popular. The DP800 automatically produces plenty of steam-distilled water and you simply dispense the distilled water from the front of the appliance when you need it.

- Pure, distilled water for use in your dental units and autoclaves.
- Eliminate bottled water expenses and hassles.
- Automatic operation.
- Simple installation.
- Proven technology.

Dental Purity is a Brand of Pure & Secure, LLC. 4120 NW 44th Street, Lincoln, NE 68524,

## SAFE, PURE WATER FOR YOUR PATIENTS

Steam-distilled water is an important key in preventing bacteria and biofilm build-up in your water lines and dental units so you can provide a safe, pure water supply for your patients.

## PURE WATER FOR YOUR AUTOCLAVES

It's important to use only pure, steam-distilled water in your autoclaves to ensure proper operation and long-life. In fact, new autoclaves won't even run unless you are using pure, steam-distilled water.

## AN EXCELLENT INVESTMENT

When comparing the DP800 to competitive distillers, which have a very short lifespan, or to bottled water it's clear that the DP800 is an excellent investment that will pay you back many times over.

## 40 YEARS OF TRUST

For 40 years, dentists around the world have used our premium steam distillation appliances (under various brand names) to ensure that they are using the highest quality water at all times.

## SPECIFICATIONS

item #.....	DP800

depth.....	18" (46 cm)
height.....	21" (54 cm)
machine weight.....	28 lbs. (13 kg)
current draw (120V).....	7.8 amps
total wattage.....	920 watts
daily production.....	7 gallons
storage capacity.....	2.5 gallons

Specifications may be subject to change without notice.

**LONG LIFESPAN** The DP800 is an appliance that is built-to-last. The DP800 has a proven track record and has been in use around the world for over 15 years.

**EASY INSTALLATION** The DP800 is easy to install. It just requires a 1/4" line into the machine. No drain line required.

**SAVE MONEY & TIME** No more running out of distilled water, last minute trips to the store or the wasted space of bottled water. \*See other brochure.

**AUTOMATIC OPERATION** The DP800 automatically produces distilled water and stores it. Just dispense distilled water whenever it's needed.

**SIMPLE MAINTENANCE** Maintenance on the DP800 is very easy.

## SO WHAT IS STEAM-DISTILLED WATER?

Steam-distilled water is extremely pure water produced by the process of evaporation, condensation and precipitation (see illustration). Steam-distilled water is consistently pure and is far superior to water produced by filters or reverse osmosis.
