Protect your Investment*

DENTAL PURITY™

Premium Steam-Distillation™
Appliances for Dentists

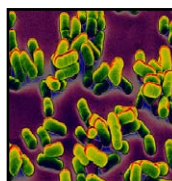

Dental Purity™ distillation appliances allow dentists to take control of their own supply of distilled water so they can ensure patient safety and protect their expensive dental equipment.

High-Purity Distilled Water

Produces distilled water from tap water. Distilled water is water that has been boiled, sterilized and purified.

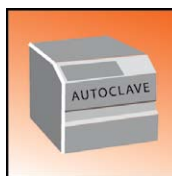

Prevent Biofilm Build-Up

Prevent bacteria and biofilm build-up in your dental units by using only distilled water in your dental unit bottles.

Reduce Bottled Water Waste

Billions of water bottles are dumped into landfills every year. Now have a green office by eliminating throw-away bottles.

Extend Equipment Life

Use only distilled water in your autoclave to reduce wear and tear, reduce maintenance and ensure a longer life.

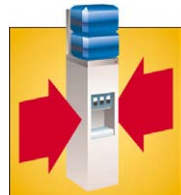

Save Money!

Dental Purity appliances reduce bottled water costs, extend equipment life, reduce maintenance and save staff time.

Gain Patient Trust

We provide you with a certificate for your waiting room to show your patients that you use only the highest-quality water.

Save Valuable Space

Dental Purity™ appliances eliminate bulky bottled water that clutters up your office.

Optional: Drinking Water For Staff

Our DP800-DLX saves you even more money because it provides FREE chilled drinking water for your staff.
